

Assignment 2: Branch Creation and Switching

Create a new branch named “feature” and switch to it. Make changes in the “feature” branch and commit them.

Step 1: Create a new branch named feature.

git branch feature

Step 2: Switch to the feature branch.

git checkout feature

Step 3: Make changes in the feature branch.

git add file.txt

Step 4: Commit the changes.

git commit -m "file.txt added in feature"
