

Assignment 7: Create a script that takes a text file and replaces all occurrences of "old_text" with "new_text". Use sed to perform this operation and output the result to a new file.

Step 1: create a file.

```
HP@Sai MINGW64 /d/Shell scripting
```

```
$ touch sample.txt
```

Step 2: Add data to that file.

```
HP@Sai MINGW64 /d/Shell scripting
```

```
$ cat > sample.txt
```

```
This is Sai Prakash Training in Wipro through RPS.
```

Step 3: Replace the Training with Employee using sed and Store in new file.

```
HP@Sai MINGW64 /d/Shell scripting
```

```
$ sed 's/Training/Employee/g' sample.txt > output.txt
```

Step 4: Run the program

```
HP@Sai MINGW64 /d/Shell scripting
```

```
$ cat output.txt
```

```
This is Sai Prakash Employee in Wipro through RPS. //output
```
